Automotive Bonnet Pack

The solution

The new pack reduces damages by 43% through designing a multi-material pack capable of withstanding the rigors of a global automotive supply chain.

The pack is designed to safely transport automotive bonnets and protecting the part from impacts to all sides, corners and faces.

In line with the customer requirement, our design has been drop tested from a height of 1.2m. The orientation of the part within the pack is important to allow inspection of the part upon receipt.

Results we deliver:

More Sales

Lower Cost

Risk Managed
