Automotive Tailgate Pack

The Solution

The pack consists of 3 parts (Outer / Base fitting / Top Fitting).

The base fitting has self locking features allowing efficient single operator assembly and uses triangular "scrolls" to locate the tailgate in position

A simple self locking top "scroll" is then located to stop any upward movement.

The outer is a Heavy Duty 0203 CA flute case.

The design uses the customer's existing Knomafoam and self adhesive bubble wrap to protect the edges of the product from damage.

The pack has a reduced footprint compared to the existing design and has less components to assemble.

Results we deliver:

More Sales

Lower Cost

Risk Managed
