Bulk Glass Pack

The solution

This new pack is an alternative to Timber Crates. Designed to hold 20 pieces of glass weighing 15KG each (300KG in total).

The “Bulk Box” style sleeve provides easy access for loading and decanting product. As the pieces are common it also reduces stock at the customer’s premises. This design also improves performance and rigidity during storage and transport.

The pallet is a bespoke design with high density foam covering the timber to provide cushioning and preventing damage and scuffing to the product.

Because the glass is not fully enclosed it has eliminated the need for a plastic shroud.

Results we deliver:

- More Sales
- Lower Cost
- Risk Managed
