Water Pump Multi Pack

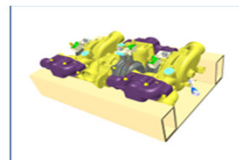

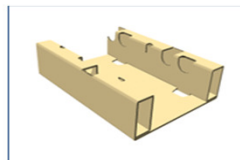

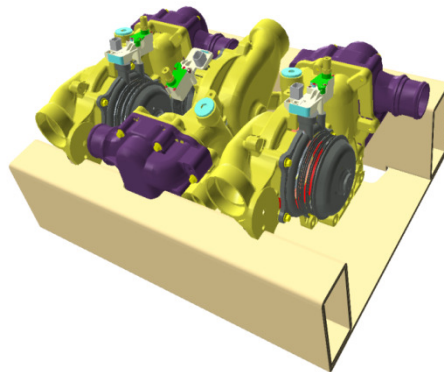

The solution

The design requirement was for three water pumps to fit on a specific fitting and to be contained within a returnable "Chep" pallet system.

The pumps weigh 25 kg each and there are two variations, one with a horizontal and the other with a vertical outlet.

Due to the size of the product and space limitations the centre product has been rotated through 180 degrees for a perfect fit.

All design work was carried out using VRML files without the physical product being available.
